Funnel

Instruction Sheet and Documentation*

Electrolyte Bottles
12V x 6 bottles, 6V x 3 bottles

Dry Charged Battery

*Packaging can include optional
safety glasses, apron and disposable gloves.

Patent Pending

Available in durable
wood crate or
heavy duty
cardboard box

- **Efficient Packaging**
reduced footprint allows more per pallet, freeing up storage space
- **Packaging Options**
Options for a durable wood crate for long distance, rail, air and sea commercial shipping or a heavy duty cardboard box for stock shelf storage and retail merchandising.
- **A Complete Solution**
everything needed to activate is included
- **Foolproof**
individual electrolyte bottles mean exact electrolyte per cell, leading to proper activation, longer life, and better performance
- **Less Mess**
Minimized spill risk due to individual electrolyte bottles and funnel fitment
- **Freight Savings**
Reduced footprint helps reduce shipping costs
- **Easier Handling**
Can be activated by a single individual
- **Long Shelf Life**
Always ready to activate and go
- **Recyclable**
electrolyte bottles are made from polypropylene and can be returned for recycling with the spent battery.
- **Reverse Shippable**
packaging can be reused to return ship scrap battery and empty electrolyte bottles for proper recycling.
- **Scalable**
Can be easily designed to fit various dry charged automotive and commercial battery sizes.
